

**A STRUCTURED MAINTENANCE PROGRAMME PRESERVES PERFORMANCE CHARACTERISTICS & MAXIMISES THE LIFE OF THE CARPET.**

### What your REVIVE visit includes:

- Removal** of debris and vegetation from surface.
- Sweeping** of the surface using integral rotating & rigid brush system.
- Decompaction** of the top 5-8mm of sand infill.
- Lifting** of the free pile/fibre.
- Deep cleaning** of the infill, removal of fine contaminants and dust.
- Re-distribution** of the clean particulate to provide even coverage.
- Weed Removal** to the perimeter of the surface.
- Repair** of up to 5 linear metres of re-stick (as necessary).
- REVIVE Report** generation and tracking through our Passport365 software.

Are you looking to prolong the life of your synthetic surface?  
Join over 60% of our clients who have taken out multi-year maintenance deals.
